

Work experience

Since Jun. 2024

**DevOps Engineer** / *Synchrone* Lyon (France)

- **Observability & Operations:** Monitoring, incident analysis, service performance optimization, Docker operations, and Kubernetes administration.
- **Automation:** Development of automation scripts (Ansible, Groovy) and deployment workflows using Jenkins for application releases and recurring operational tasks.
- **CI/CD:** Design, enhancement, and maintenance of CI/CD pipelines using Azure DevOps.
- **Application Deployment:** Preparation, execution, and validation of deployments across integration and production environments.
- **Cross-Functional Collaboration:** Providing support to development teams and coordinating with infrastructure teams to ensure high-quality deliverables.
- **Documentation & Procedures:** Authoring and maintaining operational and automation procedures.

From Dec. 2021  
to Sept. 2023

**System & Network Administrator** / *Carpe Diem IT & Télécoms*  
**Networking / Security / Communications :**

- Administration and management of network infrastructures (LAN, WAN, VPN)
- TCP/IP network interconnection (static and dynamic routing, BGP, RIP)
- Firewall administration: Stormshield, pfSense
- Configuration and management of network equipment: switching, firewalling, NAS, backup systems
- Gestion & configuration des équipements réseaux : Switching, Firewalling, NAS, Backup

**Systems / Virtualization / Cloud :**

- Management of Microsoft Azure services, Windows Domain Services (Active Directory & Azure AD), Microsoft Office 365, and Exchange Online
- Administration of Windows 7/10/11 and Windows Server (GPO, WSUS, DNS, DHCP, etc.)
- GNU/Linux administration: Debian, Ubuntu, Rocky Linux
- Virtualization technologies: KVM, Hyper-V, ESXi, Proxmox VE, Docker, Kubernetes
- Backup solutions: Beemo Technologies, Veeam Backup
- **VoIP / ToIP Deployment & Management :**
- Switched Ethernet and VLAN configuration (Cisco, HP Aruba, D-Link Nuclias)
- IPBX configuration and IP phone provisioning
- Network performance optimization for VoIP (QoS implementation)

Education

From Sept. 2021  
to Sept. 2023

**Mastère (RNCP Level 7 – equivalent to Master's Degree) in Network Infrastructure & Security** / *ORT* Lyon, France

From Sept.  
2020 to Sept.  
2021

**Bachelor's Degree (3-year degree) in Industrial and Computer Networks** / *IUT Lyon 1* Villeurbanne, France

About me

Passionate about new technologies and IT in general, I am particularly interested in constantly evolving environments where systems, networks, and automation play a key role.

I have specialized in systems and network infrastructure, as well as automation and DevOps technologies. I am motivated by complex environments that require reliability, performance optimization, and continuous improvement.
